

## **Investment Research Analyst (Full or Part Time)**

In this role, you will assist the firm's CIO or Director of Research on assignments that involve valuing, uncovering, evaluating, researching and modeling securities. This position does involve creating presentations (Powerpoint or Keynote decks) and reports. 2-3 years previous experience in the investment markets required.

We're searching for someone who's talented, hard working with passion for the markets who can work as a generalist as you will require work on various securities including Equities, Fixed Income, Options, Commodities, Hi Yield, Closed-End funds, Municipals, Emerging Market stocks and bonds, convertibles, etc. Prior exposure to all of these securities is *not* a prerequisite. This position will allow the candidate to develop and present his/her own ideas through well researched and informed analysis.
